The diagram illustrates the cell cycle and its regulatory mechanisms. It is divided into several sections:

- MEGLÉVŐ TERVEZÉSI**: Shows the initial state of the cell cycle with a G1/S checkpoint and a G2/M checkpoint. A red arrow indicates the progression from G1 to S, and a green arrow indicates the progression from G2 to M. A red arrow points to the G1/S checkpoint, and a green arrow points to the G2/M checkpoint.
- KÖZLEKEDÉS**: Shows the progression of the cell cycle through the G1/S and G2/M checkpoints. A red arrow indicates the progression from G1 to S, and a green arrow indicates the progression from G2 to M. A red arrow points to the G1/S checkpoint, and a green arrow points to the G2/M checkpoint.
- MŰVI ÉRTÉKVELEM**: Shows the progression of the cell cycle through the G1/S and G2/M checkpoints. A red arrow indicates the progression from G1 to S, and a green arrow indicates the progression from G2 to M. A red arrow points to the G1/S checkpoint, and a green arrow points to the G2/M checkpoint.
- TERVEZÉSI ÉRTÉKVELEM**: Shows the progression of the cell cycle through the G1/S and G2/M checkpoints. A red arrow indicates the progression from G1 to S, and a green arrow indicates the progression from G2 to M. A red arrow points to the G1/S checkpoint, and a green arrow points to the G2/M checkpoint.
- MEGLÉVŐ TERVEZÉSI**: Shows the initial state of the cell cycle with a G1/S checkpoint and a G2/M checkpoint. A red arrow indicates the progression from G1 to S, and a green arrow indicates the progression from G2 to M. A red arrow points to the G1/S checkpoint, and a green arrow points to the G2/M checkpoint.
