

PINCEÉPÍTÉS MÉRETEI

Technical drawing showing a cross-section of a hill (Óromfal) and a building. The building has a semi-circular roof with a height of 2.1 m. The hill's total height is indicated as 'Óromfal teljes magassága' and is less than or equal to 3.2 m. The area between the building roof and the hill surface is shaded with dots.

The diagram illustrates the cross-section of a windbreak wall. The wall has a total height of 3.2 m, labeled as 'Óromfal teljes magassága'. The top of the wall is sloped, with a vertical height of 1.0 m from the top edge to the top of the main wall section, labeled as 'Talajtakarás'. The wall is divided into two equal horizontal sections, each labeled $H/2$. The wind flow is indicated by dashed lines sloping downwards from left to right, with slopes of 10%, 20%, and 30% marked on the right side. The area behind the wall is shaded with diagonal lines.
